

MAP OF INFLUENZA DEATHS BY STATE

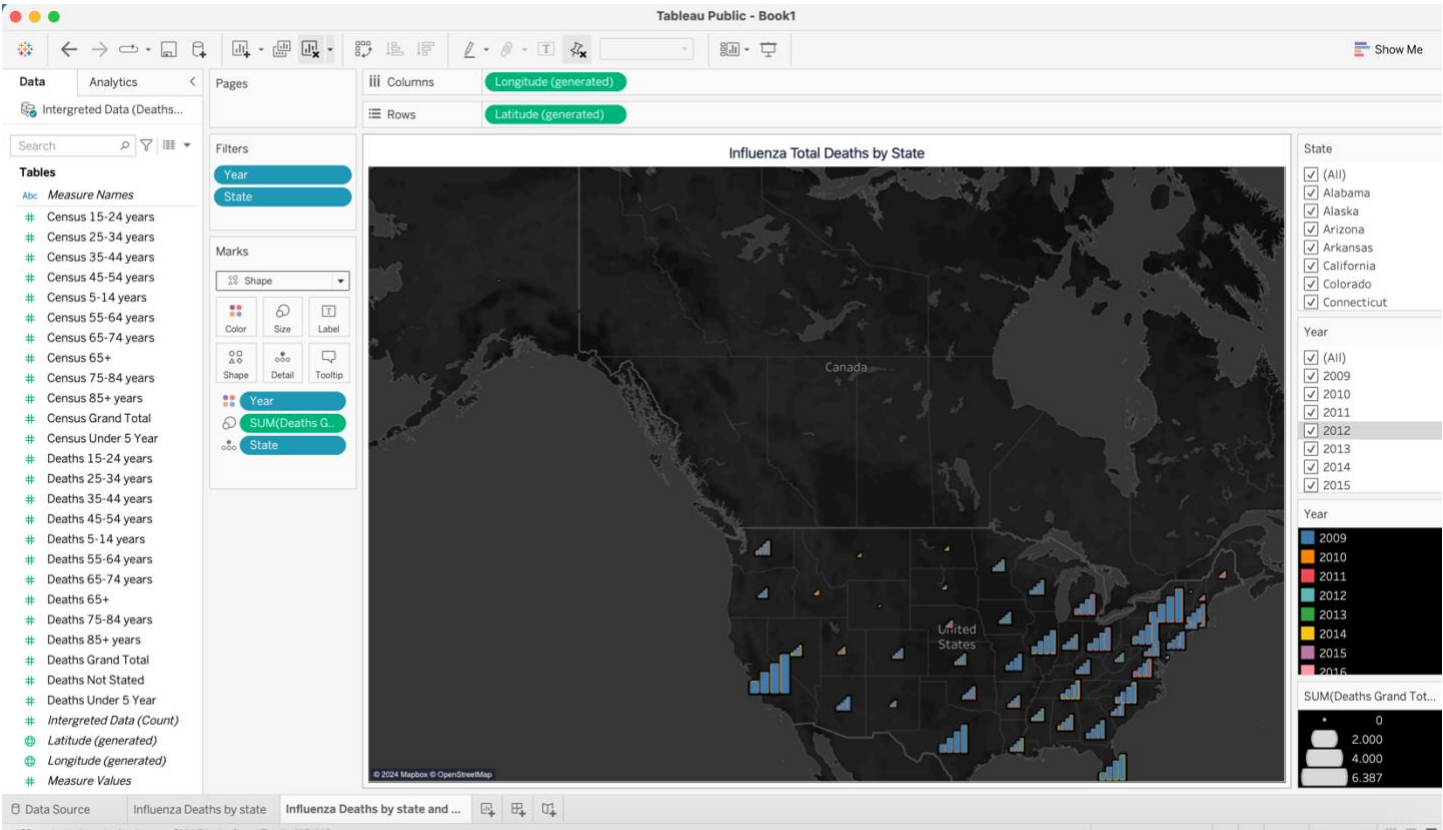

- I used the total of deaths for each state with monochromatic color scheme in 5 levels.

COMBINATION MAP

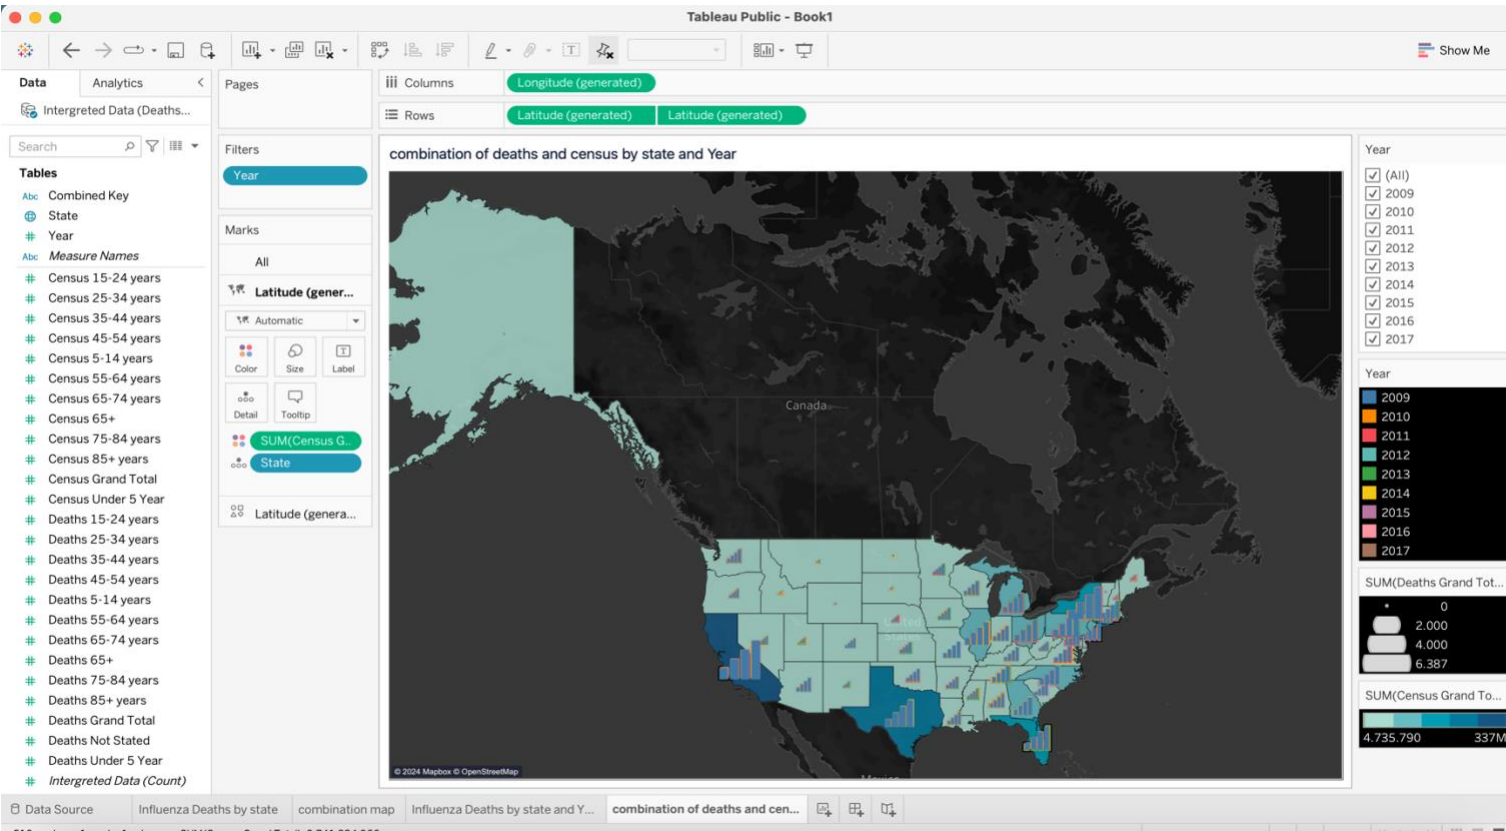

- For Combination map in upper Latitude I used Total of Census and States.
- In Lower Latitude I used Total of Deaths by color and size and States.
- Then I merged both map.
- After a glance on combination map I can say that, Deaths increased by Population.

MODIFICATION:

This map showing the mortality by year and states . Different colors represent different years, indicating fluctuation in influenza mortality over time.

COMBINATION OF DEATHS AND CENSUS BY STATE AND YEAR

- What states or regions are the highest?
For the mortality rate the highest is California.
